Dear Colleagues,

It is an honor for me to announce the next annual congress of the EAO.

After 13 years the congress will be back in Italy: in Rome, the eternal city.

The Congress Committee and the Board of the European Association for Osseointegration have put a great effort in the attempt to design a new format for the very successful annual congress.

Only 3 days of full work, a congress theme that is the backbone of the program with dedicated plenary sessions in the middle of each congress day.

The scientific works will show more interactivity with the participants, open discussion between the speakers on the podium that indicate different approaches to the same clinical problem. The whole program is designed to be a critical debate, based on the evidence, and on the various clinical experiences.

Several new sessions have been designed such as dedicated sessions for the implantologist of tomorrow, 3 research sessions open to abstract submission for studies focused on basic research, surgical topics or prosthetic problems. Hands on courses will also take place.

As usually large trade exhibitions as well as industry satellite symposia will be organized.

Rome needs no introduction and it is impossible to describe all the possible sightseeing opportunities. The Vatican, the ancient Roman ruins including the Coliseum, the marvelous buildings and paintings of the Renaissance or just the incredible flavour of a walk in the old downtown area will help in transforming the participation to the EAO congress into an unforgettable experience. We expect a very pleasant weather at the end of September with temperatures around 25° C.

Besides all this the scientific committee has worked hard to propose a very attractive program. The local scientific societies, that in Italy have a long standing tradition of high scientific and clinical level, will have dedicated sessions in English, and guest countries from outside Europe will also be part of the scientific program.

The new format of the EAO congress will be there for you, we will start our new adventure from the city where a big part of the European culture and tradition comes: Rome.

So let's meet in Rome next September, the scientific committee is sure you will have an exciting and professionally rewarding experience.

Scientific Programme

SPQR: Simplification, Predictability, Quality to achieve Results

This year, the scientific programme has been developed around one main theme entitled **"SPQR: Simplification, Predictability, Quality to achieve Results"** which will be discussed in the plenary sessions.

The three plenary sessions will focus on different aspects of SPQR namely **"Surgical alternatives"**, **"Prosthetic alternatives"** and **"Treatment outcome"**

> Parallel Sessions

- Evaluation of aesthetic and functional results
- Soft tissue recessions around implants
- Bone augmentation dilemmas

> Arena Sessions

- Is guided surgery here to stay?
- Extracting teeth in modern dentistry: Change in paradigm?
- Edentulous cases
- Reducing treatment time: is it always a must?

> Implantologists of Tomorrow

- Reduced n. and dimension of implants
- Simplification of implant surgery (one stage vs two stage)

■ Practical Workshops

■ Hands-on Courses

■ Quickfire Poster Sessions

■ Practice Management Course

■ Clinical & Basic Oral Competition

■ Satellite Industry Symposia

■ Programme organised by Local Italian Societies
