Contemporary Treatment of the Atrophic Posterior Maxilla

A Hands-On Program

April 30 - May 1, 2010 (Friday - Saturday)

New York University College of Dentistry

Linhart Continuing Dental Education Program

Linhart Continuing Dental Education Program

Sinus elevation surgery has become an indispensable part of the practice of implant surgery, periodontics and oral surgery. Procedures have evolved during the last 25 years to a point where sinus grafting surgery is considered the most successful augmentation procedure performed today and the survival rate of implants placed in these grafts is as high or higher than that of implants placed in the non-grafted posterior maxilla. The sinus elevation procedure is still evolving today due to the development of new surgical techniques and new biomimetic technologies. This two-day course features leading sinus elevation experts from two continents. Both are involved in clinical practice, teaching and research activities.

This two-day course will present sinus elevation surgery and possible alternatives to sinus elevation therapy from pre-surgical planning to prosthetic restoration. Anatomic models will be utilized to give participants a hands-on introduction to both lateral window and transcrestal techniques. This hands-on experience will include both traditional rotary techniques and piezoelectric surgical techniques. A "live" surgery and multiple video presentations will give participants complete exposure to the surgical sinus elevation experience. This course will present both evidence-based and new state-of-the-art techniques.

Course Outline:

Day 1	Day 2
8:30 – 9:00 Sinus anatomy	8:30 – 9:30 Pre-operative consultation, post-operative instructions Informed consent, legal issues
9:00 – 10:00 Evidence-based decision making about implant surfaces, graft materials and membranes	9:30 – 10:30 New technologies a. PRGF b. Growth factors c. Bone morphogenetic proteins
10:00 – 11:00 Pre-surgical diagnosis, predicting complications, when to treat and when to refer	10:30 – 12:00 Live surgery
11:00 – 12:00 Conventional surgical technique with videos	12:00 – 1:00 Lunch
12:00 – 1:00 Lunch	1:00 – 1:30 Lateral window with simultaneous GBR and lateral window with simultaneous placement
1:00 – 2:00 Piezoelectric surgical technique with videos	1:30 – 3:30 Treatment of complications, intraoperative bleeding, perforations and post-operative infections
2:00 – 3:00 Transcrestal techniques	3:30 – 4:00 Case consultations Bring cases for consultation with presenters and/or for discussion with the group
3:00 – 4:30 Hands-on participation a. Models for conventional lateral window and transcrestal techniques b. Bones, eggs and models for Piezoelectric techniques	

NYU

Stephen Wallace, DDS

Dr. Wallace is a 1971 graduate of the Boston University School of Graduate Dentistry with a certificate in periodontics. He has dedicated the last 15 years to performing sinus elevation research at New York University College of Dentistry. He has authored more than 20 peer-reviewed articles on this topic, has written numerous textbook chapters and is co-editor of a textbook on sinus elevation surgery that was published in Italy and is currently being translated for publication in English by Quintessence. He is a national and international speaker on topics related to implant dentistry and is a consultant to many manufacturers of implant related products. He is a fellow of the Academy of Osseointegration and a diplomat of the International Congress of Oral Implantologists. He is an Associate Clinical Professor at the New York University Ashman Department of Periodontology and Implant Dentistry and maintains a private practice for periodontics and implant dentistry in Waterbury, CT.

Tiziano Testori, MD, DDS

Dr. Testori is an oral surgeon from Como, Italy. He is the Department and Head at the Galleazzi Institute for Reconstructive Dentistry in Milan, Italy. Dr. Testori has published more than 30 articles and textbook chapters relating to such topics as sinus elevation, early loading, immediate loading and implant micro morphology. Along with Dr. Wallace, he is co-editor of a textbook on sinus elevation surgery. He is a national and international speaker on all the above-mentioned topics. Dr. Testori is the current president of SICO, the Italian Society of Oral Surgery. He is a visiting professor at New York University College of Dentistry and maintains a private clinic dedicated to advanced implant dentistry in Como, Italy.
